(54) Title: MEDIA STREAM MIXING

(57) Abstract: The present invention is directed towards a method and a portable communication device (200) for forming a real time output media stream by mixing a first real time media stream with a second media stream. Provision of mixing of media streams provides a number of attractive functions, for instance. This invention concerns how to increase the usage of a mobile VT application and how to be able to handle integrity issues when used in a portable communication device.
